Part B of the Mandate

“to provide advice, guidance and services to
help ensure the protection of electronic
information and of information
infrastructures of importance to the
Government of Canada;”

IPDC

Canada

ITS Cyber Defence is like being the goalie in a hockey match. Our role is to keep the puck out of our net as it comes to us. We don't focus on the opposing player, SIGINT handles that, our only concern is keeping our net free from pucks.

Here's the problem though, we bring out own refs and abide by the rulebook. Unfortunately, the ref doesn't look at the other team and they don't have a rule book... They are always on the power-play and have more than one puck on the ice at time.

So we try our best to stop the puck, but it's inevitable that some end up in the net. And if we focus our attention cleaning up our filled net, more pucks just get in...

Idents in ITS

- There are only 3
 - Email addresses
 - IP addresses
 - Domain names
- CII can get complicated
 - Email addresses are often spoofed
 - .ca domains resolve to foreign IPs
 - Legitimate company names are registered by foreign threat actors

IPOL

Closing Thoughts

- Many cyber players in Canada (Public Safety, SSC, DND, CSIS, etc.)
- ITS / SIGINT collaboration in the 5-eyes community (e.g. [REDACTED])
- Working and sharing with Industry is extremely important (lessons learned from [REDACTED])
