File / Dossier

Dear Minister:

The purpose of this letter is to provide you with the results of a "spot check" review of recognized foreign signals intelligence (SIGINT) private communications (PCs) used or retained by the Communications Security Establishment (CSE) during the period of September 1, 2014, to October 15, 2014. This review was undertaken under my general authority as articulated in Part V.1, paragraph 273.63(2)(a) of the National Defence Act (NDA), as well as under my specific authority to review ministerial authorizations (MAs) found in subsection 273.65(8) of the NDA. Prior to the commencement of the review, CSE did not have knowledge either of when this "spot check" would be conducted or of the period of time under investigation. This is the second such review I conducted in 2014.

By law, CSE may only use or retain those SIGINT PCs that are essential to international affairs, defence or security (paragraph 273.65(2)(d) of the NDA). The purpose of this review was to determine, for compliance with the law and the protection of the privacy of Canadians, whether the PCs intercepted, recognized and retained by CSE during the period of review met this essentiality test.

Subsection 273.65(1) of the *NDA* permits the Minister of National Defence to authorize CSE in writing — for the sole purpose of obtaining foreign intelligence (FI), and once he is satisfied that specific conditions set out in subsection 273.65(2) of the *NDA* have been met — to intercept PCs in relation to an activity or class of activities specified in an MA. These MAs set out the formal framework for dealing with PCs which have been intercepted unintentionally through SIGINT activities, and shield CSE from the prohibition respecting the interception of PCs found in Part VI of the *Criminal Code*. Currently, CSE conducts three distinct SIGINT

TOP SECRET // SI // CEO

collection activities or class of activities under SIGINT MAs: (1) collection activities; (2) collection activities; and (3) collection activities.
At the request of my office, CSE provided a list of all SIGINT PCs intercepted and recognized during the period we requested. During this time, CSE SIGINT PCs for use in future reporting and CSE marked recognized PCs for deletion.
I found nothing to suggest that any of the PCs that were recognized by CSE were intercepted intentionally, which would be unlawful.
To increase the assurance that I can provide to you in these kinds of reviews, my office verified that all PCs that had been marked for deletion by CSE analysts were in fact deleted in CSE databases within as required by CSE policy on retention and disposition of SIGINT information.
Both "spot check" reviews conducted this year demonstrate that CSE is taking action to quickly

implement the recommendations I made in my March 2014 Annual Combined Review of Foreign Signals Intelligence Ministerial Authorizations and Intercepted Private Communications for 2012-2013, namely that:

CSE analysts should immediately annotate recognized PCs for essentiality to international affairs, defence or security, as required by the *NDA* or, if not essential, for deletion; and

CSE analysts should regularly assess, at a minimum quarterly, whether the ongoing retention of a recognized PC not yet used in an End Product Report is strictly necessary and remains essential to international affairs, defence or security or whether that PC should be deleted.

I am making no recommendations as a result of this "spot check".

CSE use or retention of PCs goes to the heart of my mandate to determine whether CSE activities complied with the law. I will continue to conduct "spot check" verifications of CSE use and retention of any recognized SIGINT PCs. Such reviews will be expanded to include samples of other activities which have the potential to impact the privacy of Canadians, including intercepted and recognized one-end Canadian located outside Canada as well as PCs intercepted by CSE's second party partners shared with and recognized by CSE.

TOP SECRET // SI // CEO

CSE officials were provided an opportunity to review and comment on the results of the review for factual accuracy, prior to finalizing this letter.

If you have any questions or comments, I will be pleased to discuss them with you at your convenience.

Yours sincerely,

Jean-Pierre Plouffe

Mr. John Forster, Chief, CS c.c.
